### **DETAILED ACTION**

1. Claims 1-510 have been presented for examination. Claims 1-6 have been canceled and new claims 7-510 have been added in an amendment filed 08/04/2000. Claims 7-510 are subject to a restriction and election requirement.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 7-28, 30-41; 133-154, 156-167; 259-280, 282-293; and 385-406, 408-419, drawn to a system including user authentication/digital certificate, classified in class 713, subclass 193.
  - II. Claims 7, 29, 42-80; 133, 155, 168-206; 259, 281, 294-332; and 385, 407, 420-458, drawn to a system including digital signature/electronic seal, classified in class 713, subclass 179.
  - III. Claims 7, 81-92; 133, 207-218; 259, 333-344; 385, 459-470, drawn to a system including a file with steganographically encoded information, classified in class 713, subclass 176.
  - IV. Claims 7, 93-132; 133, 219-258; 259, 345-384; and 385, 471-510, drawn to a system including two apparatuses and an electronic intermediary, classified in class 705, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions, Groups I, II, III, and IV, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

Art Unit: 2132

shown to be separately usable. In the instant case, invention I has separate utility such as authenticating the user of the system; invention II, certifying a user by an authority; invention III, hiding information in an audio, video, image, or text file; and invention IV, facilitating item transactions. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for any of Groups I, II, III, and IV is not required for the other groups, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Andrew Schwaab, Reg. No. 38,611 on 08/31/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2132

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
